SUMMARY

UI/UX Designer with frontend development skills, specializing in mobile and web product design. Final-year Digital Innovation Technology student at Rangsit University with experience designing healthcare, e-commerce, and business management systems through end-to-end UX processes. Skilled in user research, information architecture, wireframing, prototyping, and design systems, with the ability to translate designs into responsive frontend interfaces.

EXPERIENCE

UI/UX Designer & Line OA Designer (Intern) · Thonburi Hospital Jan 2025 – Apr 2025 · Bangkok, TH

- Designed UI and content for the hospital's Line Official Account, creating intuitive user flows and visual assets to improve patient communication and engagement.
- Collaborated with the development team to define system architecture for the Line OA platform, translating business requirements into structured information flows and documentation.
- Applied UX principles to a healthcare context, ensuring interfaces were accessible and clearly navigable for a broad patient demographic.

EDUCATION

B.Sc. Digital Innovation Technology · Rangsit University 2023 – 2027 (Expected) · Pathum Thani, TH

- Relevant coursework: User Interface Design, Digital Systems, Software Development, Innovation & Entrepreneurship.
- 3rd Place — CIMSO RSU Hackathon: Delivered a design solution under time pressure and presented to an industry judging panel.

Pearson Level 3 International Foundation Diploma (UK) · Pearson / Rangsit University 2023

- UK-equivalent Level 3 qualification covering academic and professional foundations, completed prior to undergraduate enrolment.

SELECTED PROJECTS

Alote — Mobile Job App · UI/UX Case Study · Behance 2025

- Designed end-to-end mobile experience for a Myanmar-language job search app — user research, information architecture, wireframes, and high-fidelity prototypes.
- Prioritised accessibility and readability for users with varying digital literacy.

Cosmetic Retail POS & Warehouse Management System · UI/UX Case Study · Behance 2025

- Designed a dual-interface system for retail staff and warehouse managers, balancing information density with usability.
- Built a component-based design system in Figma to ensure visual consistency across all screens.

PowerHive — Fitness Mobile App · UI/UX Case Study · Behance 2024

- Designed a fitness tracking app focused on motivation-driven UI and clear data visualisation for workout progress.

SouthernRoot Jeans · UI/UX Case Study · Behance2024

- Designed e-commerce UI for a fashion brand, applying editorial aesthetic sensibility to product browsing and checkout flows.

Apple Website Clone · Frontend Development · Live2024

- Rebuilt Apple's marketing website in HTML, CSS, and JavaScript — demonstrating ability to translate high-fidelity design into pixel-accurate frontend code.
